FOURTH-QUARTER BUSINESS OVERVIEW

Management believes that measuring sales growth rates on an organic basis, which excludes the impact of foreign exchange and the impact of discontinuing the ZonePerfect® product line in the Nutrition business, is an appropriate way for investors to best understand the core underlying performance of the business. Management further believes that measuring sales growth rates on an organic basis excluding COVID-19 tests is an appropriate way for investors to best understand the underlying performance of the company as the demand for COVID-19 tests has significantly declined following the transition from a pandemic to endemic phase.

Note: In order to compute results excluding the impact of exchange rates, current year U.S. dollar sales are multiplied or divided, as appropriate, by the current year average foreign exchange rates and then those amounts are multiplied or divided, as appropriate, by the prior year average foreign exchange rates.
