FIRST-QUARTER BUSINESS OVERVIEW

Comparable sales growth:

Management believes that measuring sales growth on a comparable basis is an appropriate way for investors to best understand the underlying performance of the business. Comparable sales growth includes the prior and current year sales of Exact Sciences, a cancer diagnostics company that Abbott acquired on March 23, 2026. Comparable sales growth excludes the impact of foreign exchange and revenue in both the prior and current year related to compensation payments that Abbott's Structural Heart business received as part of a multi-year agreement with a competitor. The final payment under this agreement was recognized in the first quarter of 2026.

Note: In order to compute results excluding the impact of exchange rates, current year U.S. dollar sales are multiplied or divided, as appropriate, by the current year average foreign exchange rates and then those amounts are multiplied or divided, as appropriate, by the prior year average foreign exchange rates.
